TITLE : SOLIDLIKE WRITING UTENCIL

ABSTRACT : PURPOSE: To provide a solidlike writing utencil having merits of both solid and liq. writing utencils, excellent fixability, ease of drawing therewith and quick dryability, and a capability of writing in the same writing way as in the case of a solid writing utencil with a smooth touch in drawing lines which is very close to that in the case of a liq. writing utencil.

CONSTITUTION: A solidlike writing utencil contains a gelling component, an org. solvent component, a resin component, and a coloring matter component. A benzylidenesorbitol is used as the gelling component, while at least two org. solvents including an aliph. lower alcohol as the principal solvent and an aprotic polar solvent as the co-solvent in combination are used as the org. solvent component.
